

Parenting Through Adversity Turning Challenges into Resiliency

All parents naturally seek to do all they can to help their children thrive. But, at what point does our work to create an ideal environment impact their proficiency in navigating uncertainty, adversity, and discomfort?

Join us for a morning workshop that will challenge all caregivers to consider what our children are actually capable of, ways we may unintentionally hinder this, and how to help children create resiliency and independence when confronted with the many challenges of the human experience.
